

Industry-specific education with support for integration citizens and bilinguals

Targeted education for the *Service & Hospitality industry*

... as well as new industries and languages that are constantly being added

E-asylearn is an e-learning platform that supports bilingual learners and unemployed citizens who want to improve their skills. With different learning techniques, they improve their language skills and get the tools to fulfill their full potential. This is done by linking the learning directly to the work they will be doing. This is how the citizen gets work despite the various barriers, while the workforce is strengthened and more growth is achieved.

E-asylearn upskills in various industries

Immigrants and bilinguals

- People wishing upskilling and improved competences. These people can have little or no connection to the labor market or language barriers.
- Immigrant women from third countries
- Illiterates and people with limited education
- People with physical or mental disabilities

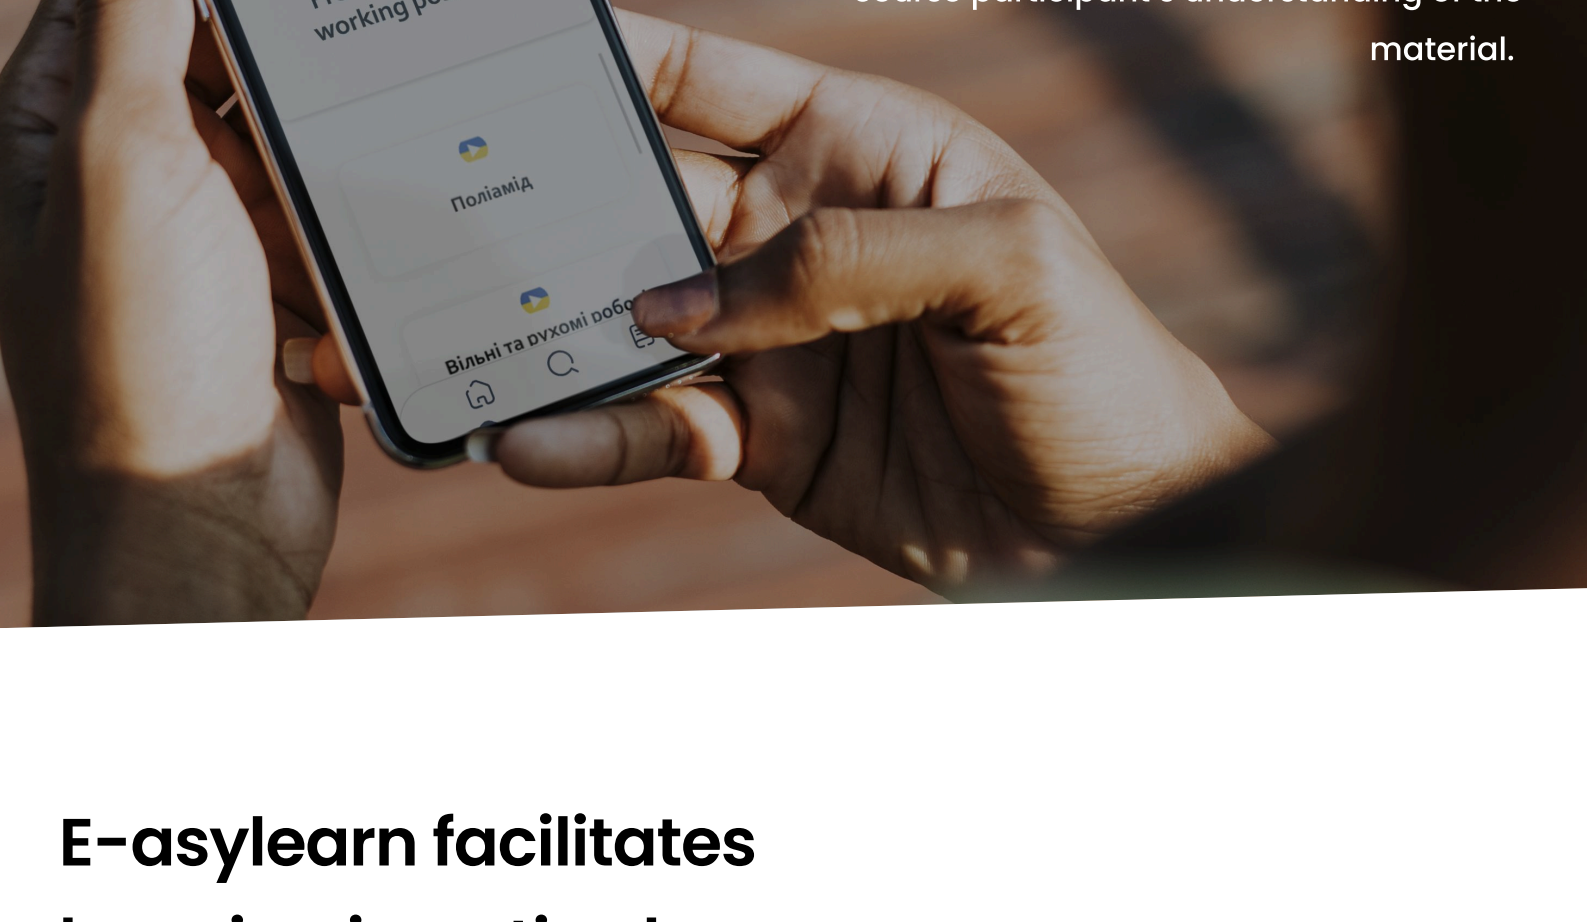

Refugees

- Great opportunity for support in Ukrainian for Ukrainian refugees wishing to participate on the labor market

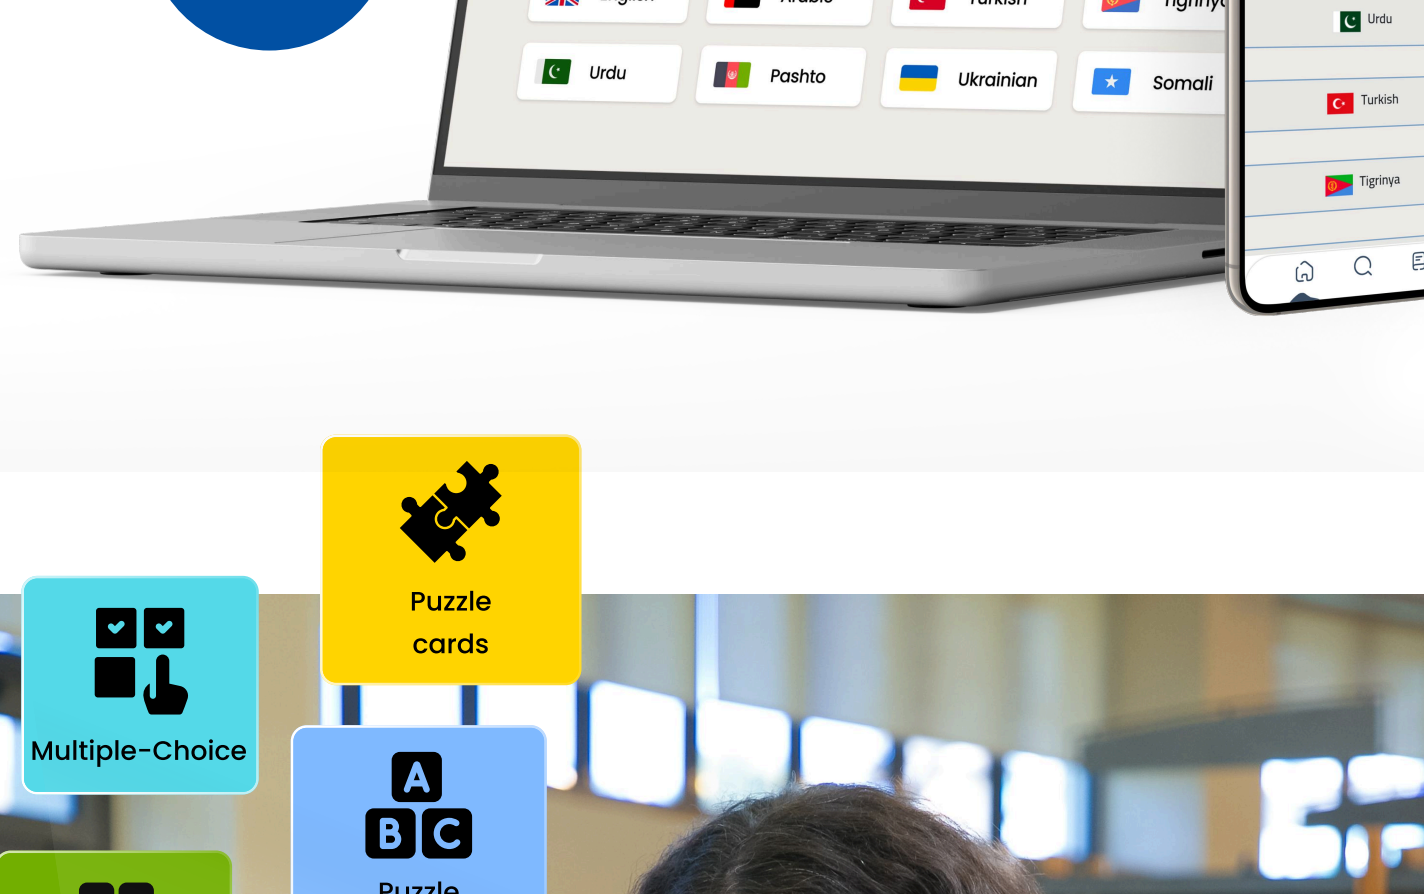

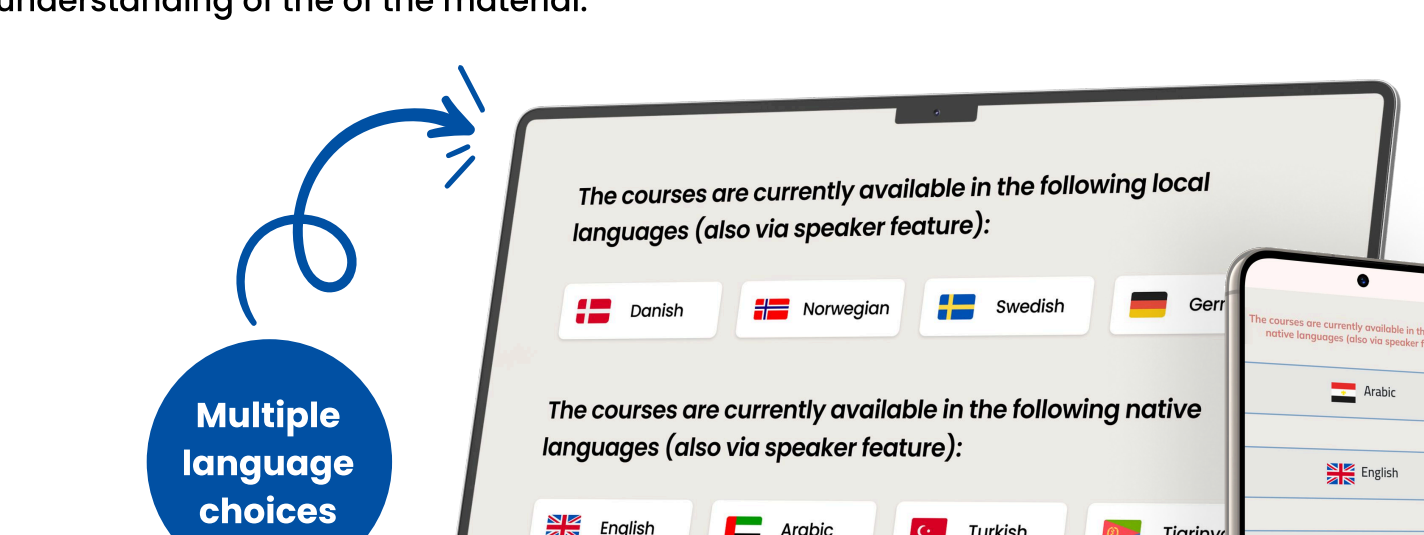

Migrants looking for upskilling

- EU-citizens looking for seasonal work or residence in another EU-country

People with learning difficulties (dyslexia)

Job-oriented courses at your fingertips: Start, learn, practice, pass!

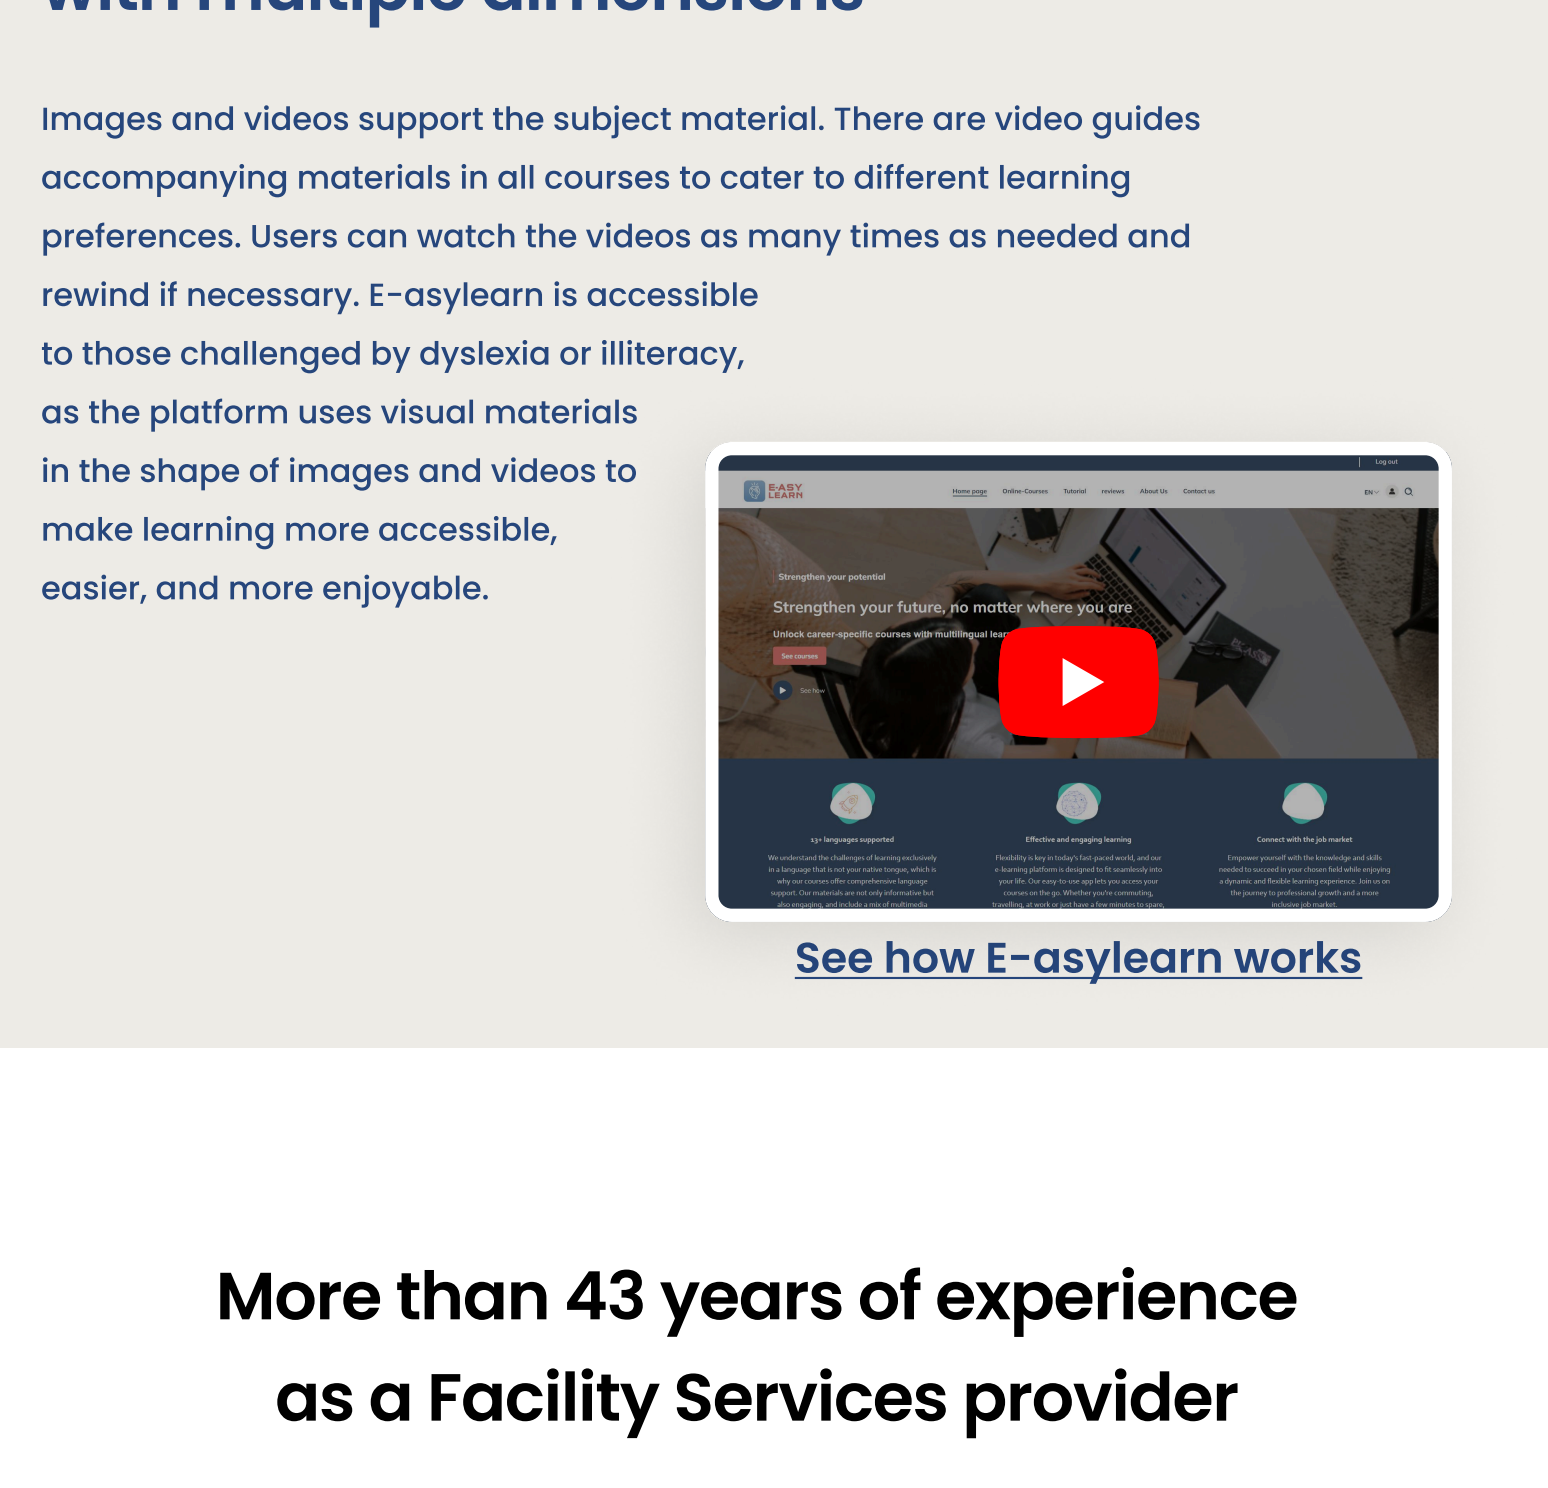

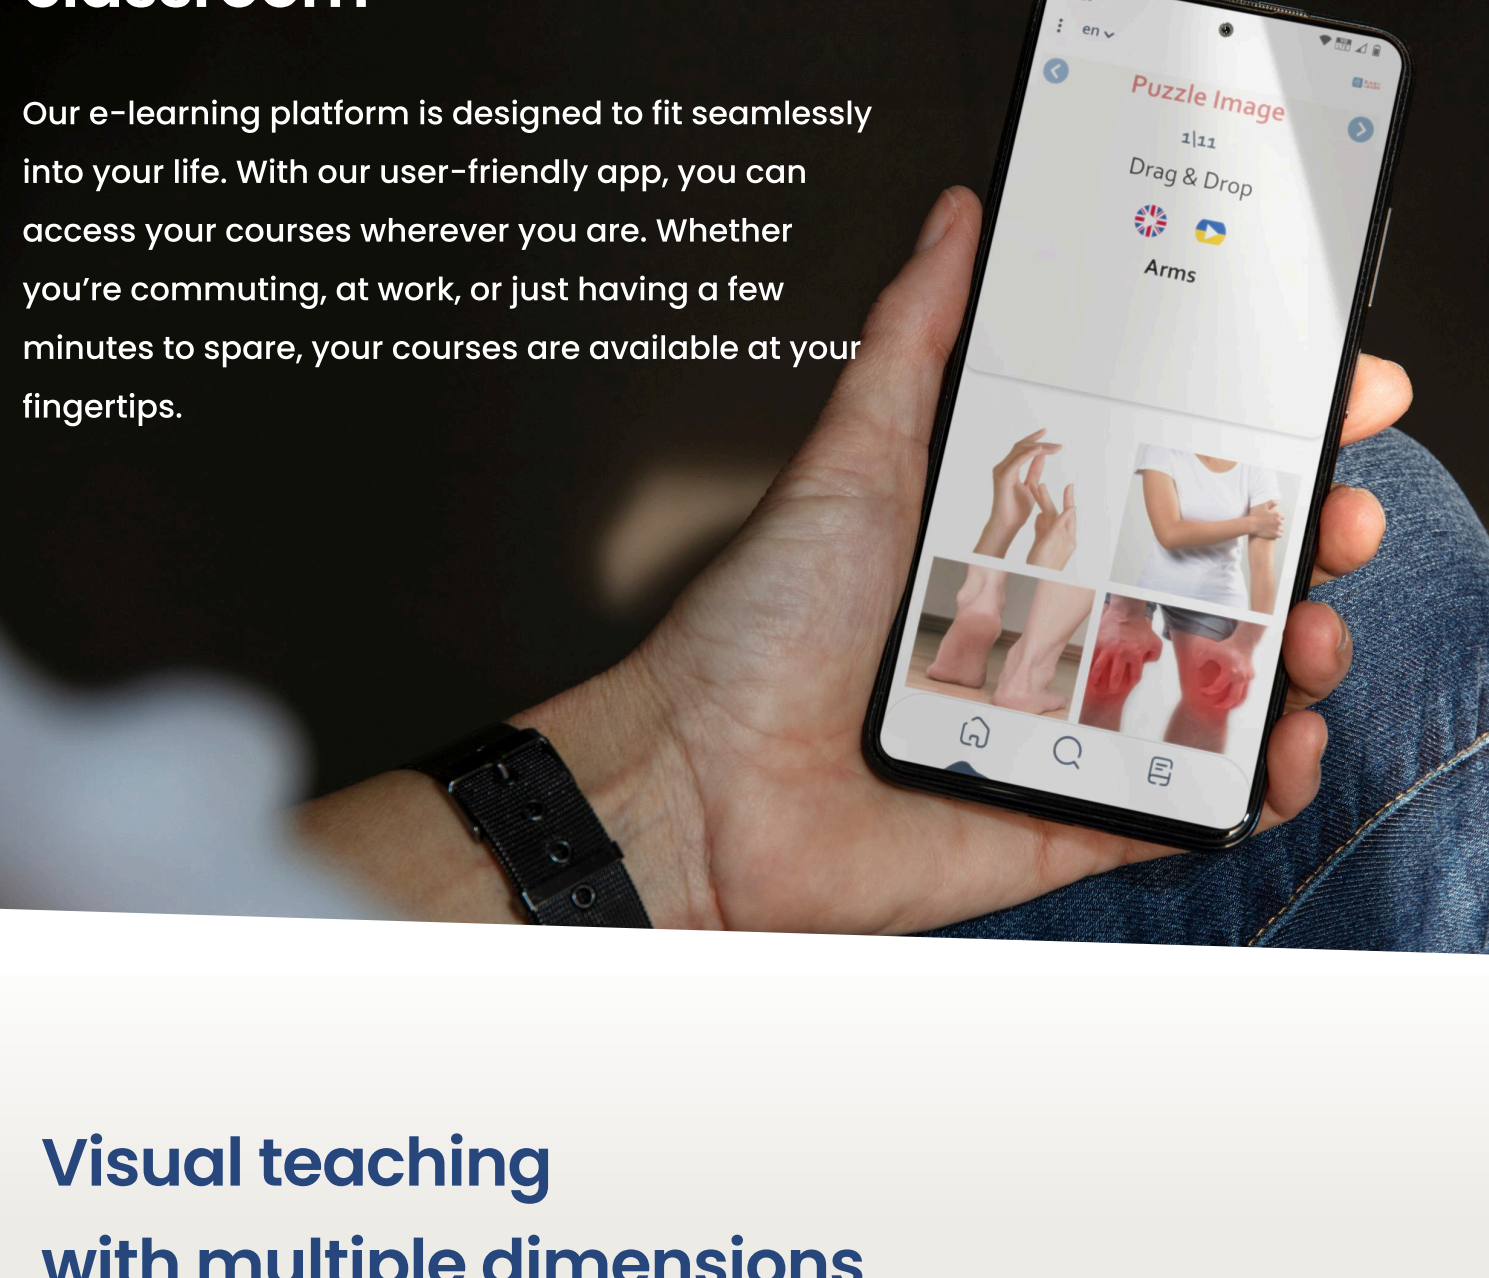

Learn the industry language based on your native language

This special feature is used to listen to the course materials in your native language to ensure the course participant's understanding of the material.

E-asylearn facilitates learning in native language

All questions are in Danish, German, English, Swedish, and Norwegian, but by using the translation feature in the app, they can be translated into your native language. There is a pronunciation function integrated into all exercises where one learns to pronounce the word in the local language. The integrated translation feature means that the course participant both understands the word from the translation into their native language and strengthens their understanding of the local language and pronunciation through the supportive speaker feature. In this way, the platform can act as a complement to teaching, as it supports the understanding of the material.

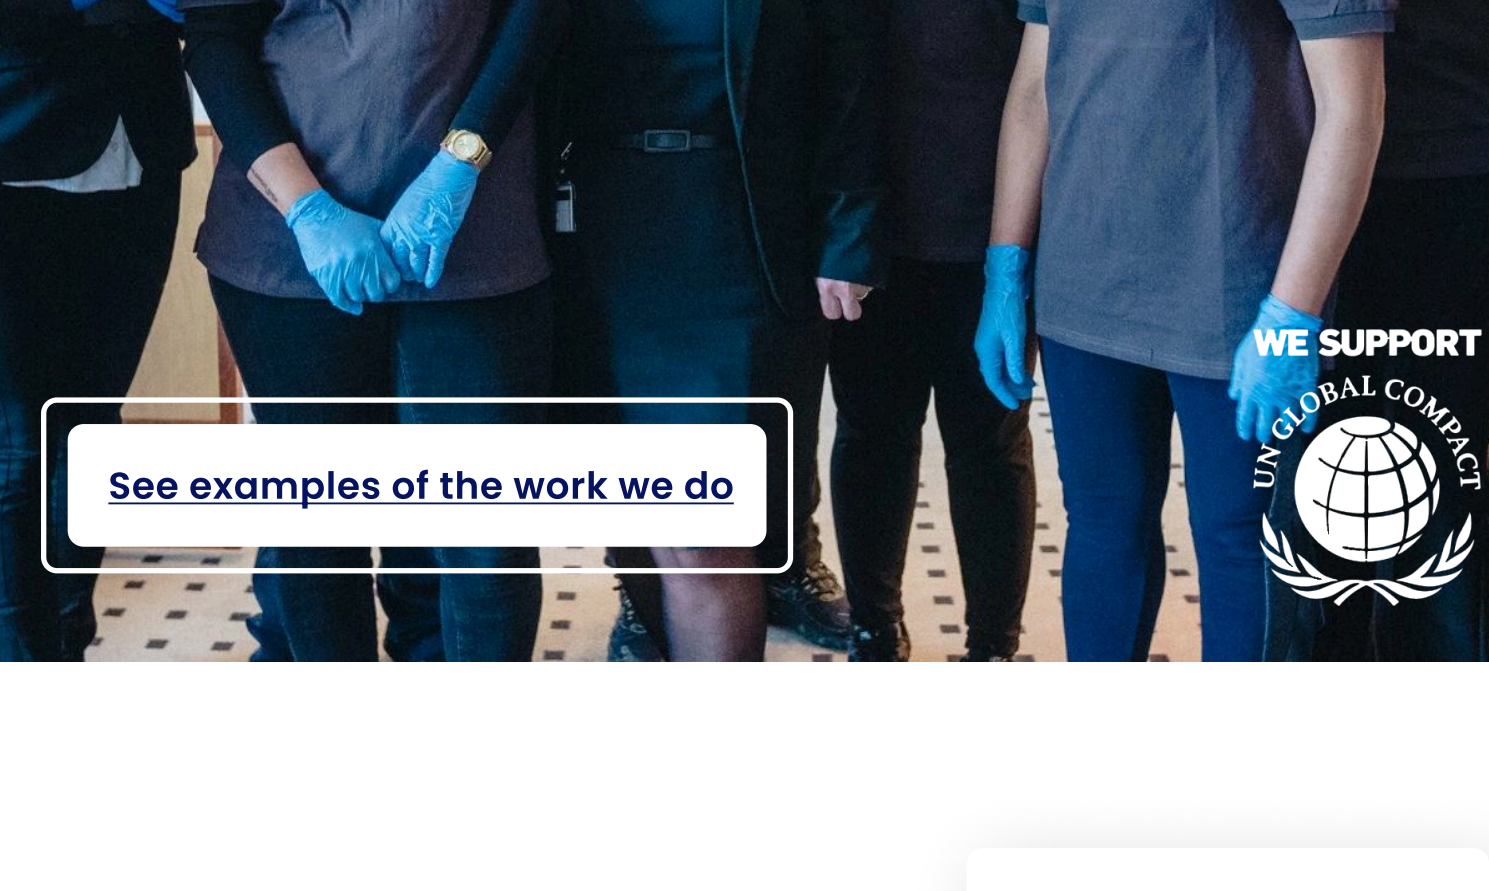

Elements of gamification in education

All our courses have integrated elements of gamification used as an educational tool, where we have developed educational exercises aimed at supporting the course participant's learning based on industry-specific courses. We support the user in achieving language competences relevant to their job responsibilities.

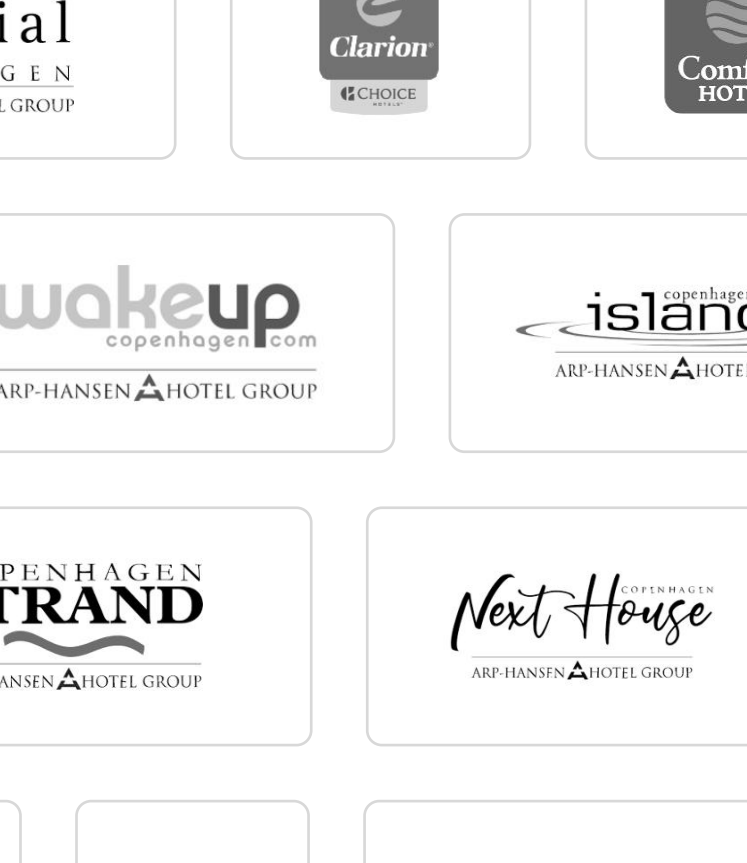

Access the learning material outside the classroom

Our e-learning platform is designed to fit seamlessly into your life. With our user-friendly app, you can access your courses wherever you are. Whether you're commuting, at work, or just having a few minutes to spare, your courses are available at your fingertips.

Visual teaching with multiple dimensions

Images and videos support the subject material. There are learning guides accompanying materials in all courses to cater to different learning preferences. Users can watch the videos as many times as needed and rewind if necessary. E-asylearn is accessible to those challenged by dyslexia or illiteracy, as the platform uses visual materials in the shape of images and videos to make learning more accessible, easier, and more enjoyable.

More than 43 years of experience as a Facility Services provider

KHRS ApS is a recognized service company, based in Copenhagen, that has existed since 1981. With more than 43 years of experience, specializing in delivering high-quality services to 4- and 5-star hotels. Our services meet the "Service Standard" and are accredited by DS (Danish Standard), ensuring customers high quality, integrity, and morality. We have an agreement with 3F and are a member of the HORESTA Employer Association. We take our responsibility as an actor in different society seriously, demonstrated by having more than 67 Danish nationalities among our staff.

With many years of experience in the hotel and restaurant industry, we have developed effective methods to recruit, integrate, and employ unskilled refugees, citizens with special challenges, family reunified individuals, and long-term unemployed in the labor market.

Since 2006 we have run successful projects and collaborations with job centers, municipalities, agencies, companies, and organizations. The target group has included integration citizens and bilingual individuals with language barriers, refugees, non-Western immigrant women with a lack of work identity, physical or psychological challenges, etc.

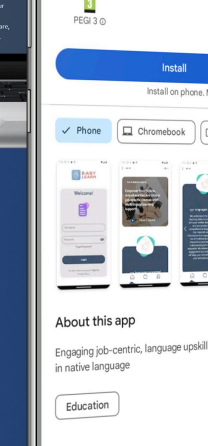

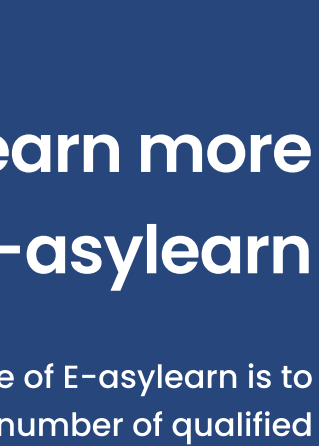

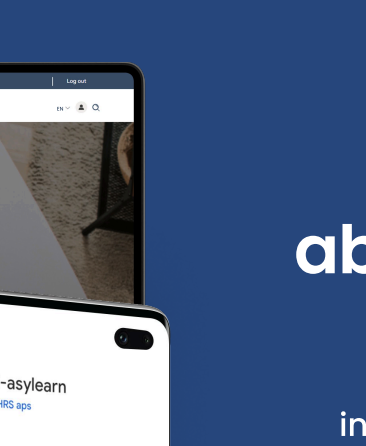

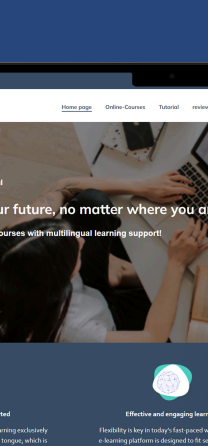

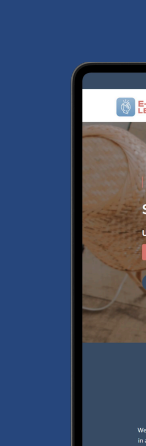

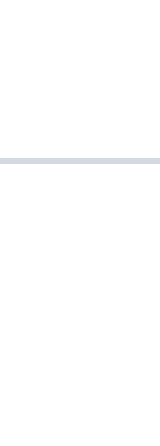

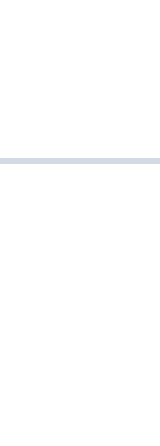

We have strong partnerships with Nordic partners, EURES, ministries, municipalities, and relevant organizations that expand our operational capacity and reach.

As a EURES partner and with extensive experience from EU projects with Sweden, Norway, Spain, and Finland, KHRS actively contributes to promoting free movement in the European labor market. Our commitment to Corporate Social Responsibility (CSR) and partnership in the UN Global Compact underscores our goal of creating inclusive and sustainable employment opportunities.

With over 43 years of experience as a well-established and recognized Facility services provider, we stand strong today with our KHRS Academy and e-learning platform, E-asylearn, which links upskilling and learning directly to the labor market.

KHRS delivers high-quality service to esteemed partners
